SUMMARY

React.js developer experienced in building responsive web and mobile apps. Skilled in component-based architecture, state management, and RESTful APIs. Focused on clean code and delivering scalable, high-performance front-end solutions.

EXPERIENCE

UI/UX Developer- I | Inductive Quotient Analytics

August 2024 - Present, Hyderabad, Telangana

- Developed a React.js-based application to modernize and streamline research data workflows for Contract Research Organizations (CROs), replacing manual Excel and paper-based processes.
- Designed and implemented form generation to accommodate flexible, project-specific data entry requirements.
- Enhanced data reliability and accessibility by integrating real-time validation and structured data storage mechanisms.

PROJECTS

TrialLattice | Inductive Quotient Analytics PVT. LTD.

November 2025 - Present

- Developed a B2B marketplace platform using React.js, connecting clinical trial sponsors with research sites to streamline the trial-matching process.
- Created responsive investigator and sponsor dashboards to manage active bids, facility portfolios, and communication logs within a centralized web interface.
- Developed interactive "Site Profile" microsites, enabling research facilities to showcase clinical infrastructure, specialized medical equipment.
- Leveraged Tanstack Query for advanced caching, implementing strategic data-fetching policies that eliminated unnecessary network requests and ensured a high-performance, responsive user interface.

Inductive ClinDatasphere | Inductive Quotient Analytics PVT. LTD.

March 2025 - October 2025

- Engineered a cross-platform mobile application using React Native and React Native Paper, enabling doctors to perform real-time clinical research data entry and patient management.
- Developed a structured navigation system for clinical trials to manage the hierarchy of sites and visits, improving ease of use and reducing data entry errors for doctors.
- Developed a financial module to automate the generation of site invoices for subjects who successfully completed clinical trials, reducing administrative overhead.
- Integrated a secure digital signature feature for site agreements, streamlining the onboarding process for investigators and ensuring regulatory compliance.

EDUCATION

Bachelor of Technology in Computer Science and Engineering | SRKR Engineering College

Bhimavaram, 2023

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals | Microsoft

2023

SKILLS

Frontend: HTML, CSS, JavaScript, React.js, React Native, Next

Backend: Go

Databases: PostgreSQL

Frameworks: Bootstrap, Tailwind CSS, Gin

Libraries: Redux-toolkit, Tanstack query

Others: Git, Docker
